

The image shows the interior of a large, modern barn. The ceiling is made of horizontal wooden planks. Three ornate, black wrought-iron chandeliers with multiple lit candles hang from the ceiling. The walls are also made of wood, with a large section of multi-paned windows on the left and right sides. The floor is made of light-colored, square tiles. The overall atmosphere is bright and airy, with natural light streaming in from the windows.

Table Layouts

Table Layout Guide Introduction

You can comfortably seat between 4-6 guests at an individual table if seating on both sides.

Highchairs should be hired in via your caterers if needed.

If you plan to have anything else in the Main Barn before the room turn around, e.g. music equipment, please do plan this into the layout. If you have 5 rows of tables, please note there is not enough space for anything along the walls.

The layouts in this document are a guide and show the best fits based on your guest numbers. If you would like to look at alternative layouts please ask the office team and we would be happy to check your layout will fit in the space or send some bespoke options.

The Top Table

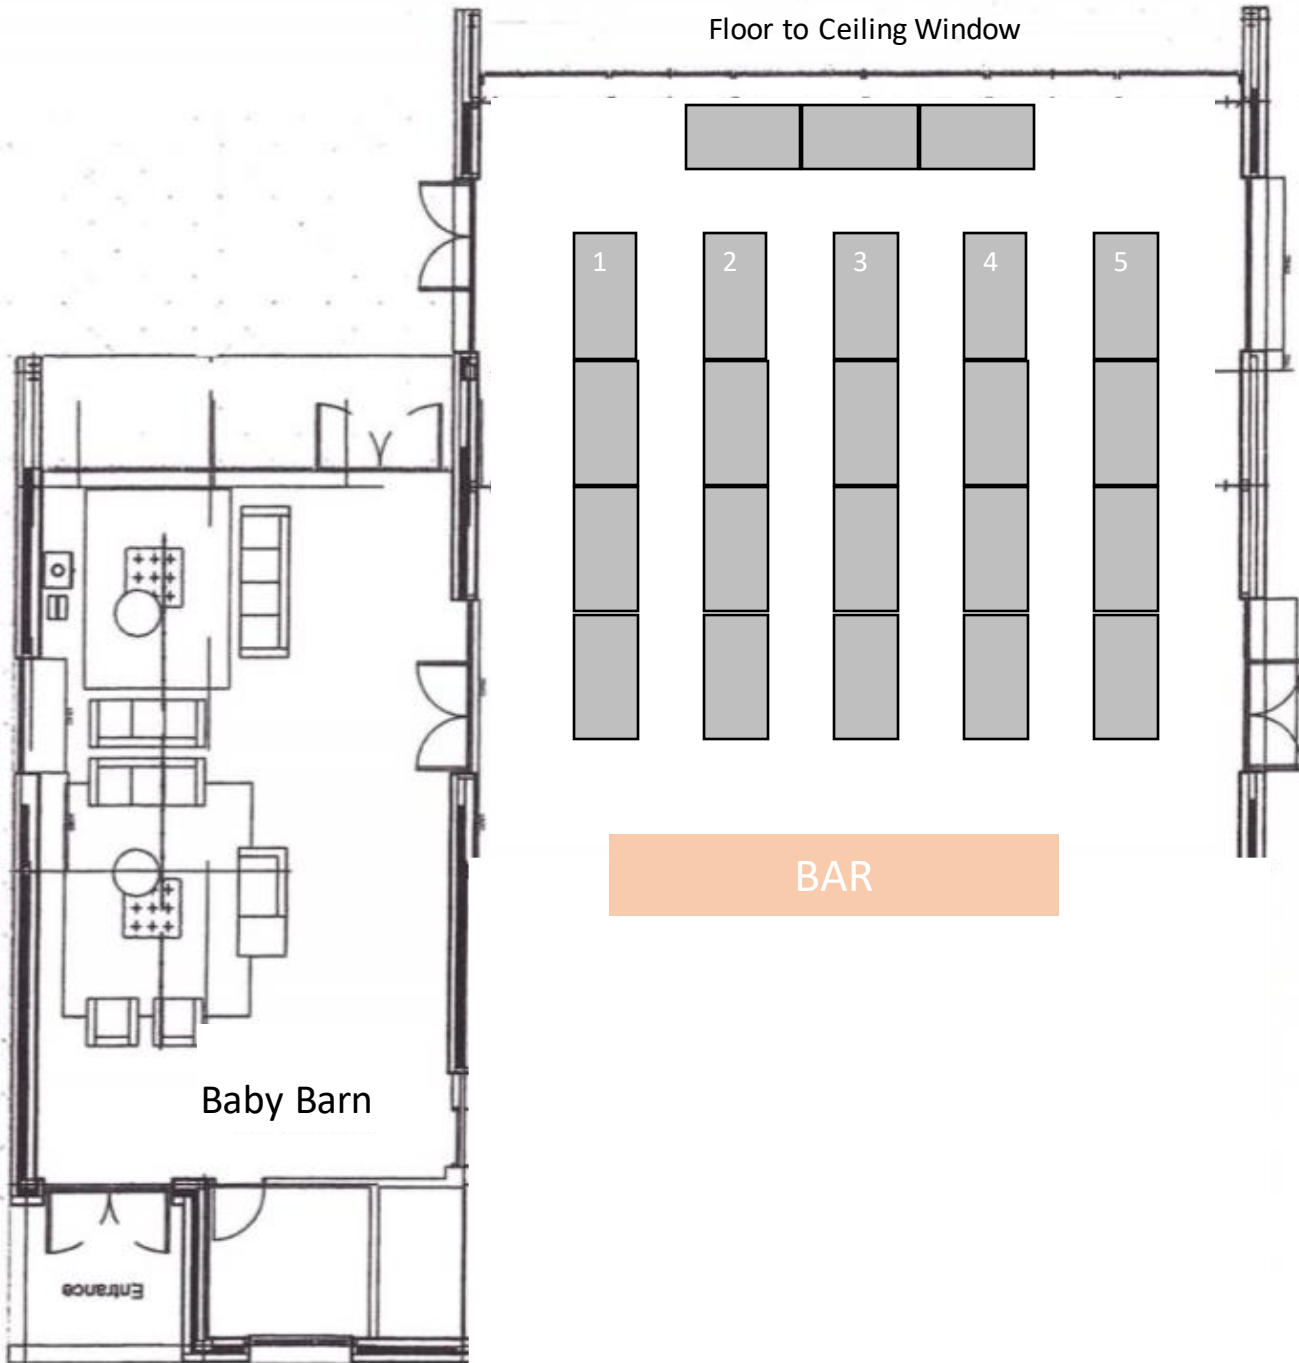

- The number of guests on the top table, if you are having one, varies at every wedding.
- The table plans on this guide are based on 6 – 9 guests seated along one side.
- You can increase this by adding a table or 2, or seating on both sides of the table.
- If you have less than 6 guests at the top table you can remove a table or 2
- The maximum number of guests we can seat with a top table in front of the windows is 120 **PLUS** the number of guests on the top table. E.g. 129 if there are 9 guests at the top table

Round Tables

- If you would prefer to have round tables, these can be hired in via your caterers.
- Please note that our maximum capacity is reduced with round tables, if you have more than 100 guests please discuss with the office team.
